

Matthew T. Rakher, Ph.D.
Senior Research Staff Scientist
HRL Laboratories, LLC
3011 Malibu Canyon Rd
Malibu, CA 90265
mtrakher@hrl.com

February 12, 2019

HRL Laboratories LLC in Malibu, CA is recruiting outstanding young scientists and engineers for an exciting project at the frontier of science and technology. In particular, we are looking for graduating seniors, recent graduates, and graduate students who are interested in working in an industrial laboratory setting on research utilizing nanoscale quantum-effect devices at cryogenic temperatures. Individuals at the Bachelor's, Master's, and PhD level who have completed rigorous training in physics, applied physics, or electrical engineering are encouraged to apply to join our team at HRL. These openings are not internships; candidates are expected to work full time for at least two years and preference is given to those who have more long-term interests. Previous laboratory experience with low noise electrical measurements, nanoscale electronic devices, and cryogenics is desirable, but good scientific communication skills, a strong work ethic, and a natural scientific curiosity are required. In addition, US citizenship is required and applicants must be willing to apply for a security clearance. Please email me at mtrakher@hrl.com directly for more information.

Sincerely,

Matthew Rakher
